Fractal - Wikipedia Random fractals use stochastic rules; e.g., Lévy flight, percolation clusters, self avoiding walks, fractal landscapes, trajectories of Brownian motion and the Brownian tree (i.e., dendritic fractals generated by modeling diffusion-limited aggregation or reaction-limited aggregation clusters. Fractal Audio Systems - Official Site Fractal Audio Systems™ new flagship processor is packed with power, features, and upgrades. Featuring our latest amp modeling technology, thousands of UltraRes™, 8 speaker cab simulations, and industry-leading effects, the Axe-Fx III has more raw power and features than any guitar processor ever created. Modelling nature with fractals | plus.maths.org Fractals are now used in many forms to create textured landscapes and other intricate models. It is possible to create all sorts of realistic fractal forgeries , images of natural scenes, such as lunar landscapes, mountain ranges and coastlines to name but a few.

Fractal landscape - Wikipedia A fractal landscape is a surface generated using a stochastic algorithm designed to produce fractal behaviour that mimics the appearance of natural terrain. In other words, the result of the procedure is not a deterministic fractal surface, but rather a random surface that exhibits fractal behaviour. Fractal Analysis and Modeling of VoIP Traffic - ResearchGate Fractal Analysis and Modeling of VoIP Traffic, Trang Dinh Dang, Balázs Sonkoly, Sándor Molnár High Speed Networks Lab, Dept. of Telecommunications & Media Informatics. Experimental determination and fractal modeling of the ... In particular, as inspired by fractal modeling of the effective thermal conductivity for unsaturated, three-phase porous media , the fractal theory seems to be promising for establishment of a thermal conductivity model for moist AAC.

Modeling fractal structure of systems of Cities using ... between different fractal models. The correlation function is an effective mathematical tool to describe the fractal structure of the chaotic attractor in pseudo phase space. It is simple yet natural to extend the correlation function analysis from the phase space. Fractional and fractal derivatives modeling of turbulence Fractional and fractal derivatives modeling of turbulence W. Chen Institute of Applied Physics and Computational Mathematics, P.O. (1994) proposed the concentration-area fractal model (C-A), which represents the first important advancement in fractal/multifractal modeling of geochemical data (Zuo et al., 2012) and is a fundamental technique used frequently for modeling geochemical anomalies (Carranza, 2009).
